

Subhankar Roy

UI Lead | Senior UI Developer (10+ Years)

Bangalore | +91 8240281312 | roysubho687@gmail.com | linkedin.com/in/uisubho

PROFESSIONAL SUMMARY

UI Lead with 10+ years of experience in frontend architecture, building scalable systems using React, microfrontends, and headless CMS (AEM). Proven track record in performance optimization (30%+), design systems, and delivering multi-tenant platforms using AI-assisted development.

TECHNICAL SKILLS

JavaScript (ES6+), TypeScript | **React**, Redux, **Microfrontends** | AEM (Headless CMS) | Node.js | HTML, CSS, Material UI | **Jest** | AWS | CI/CD, Agile, **Performance Optimization**

EXPERIENCE

Photon | Tech Lead *(Oct 2025 – Present, Bangalore)*

- Led frontend architecture for multi-tenant travel platforms.
- Developed reusable AEM-driven components, reducing development effort.
- Optimized performance using React hooks, improving rendering efficiency and reducing re-renders.

Oracle | Senior Member of Technical Staff *(Nov 2024 – Jul 2025, Kolkata)*

- Improved performance by **30%** through modernization.
- Developed reusable UI components using OJET.
- Reduced testing effort by **20%** via automation (Selegen).

LTIMindtree | Senior Software Engineer *(May 2022 – Oct 2024, Kolkata)*

- Designed and developed scalable React applications with Jest-Cucumber/Enzyme.
- Reduced code complexity via ES6+ best practices.
- Accelerated delivery using AI tools (GitHub Copilot).

TCS | Systems Engineer *(Dec 2018 – May 2022, Kolkata)*

- Integrated PayPal, Stripe, Authorize.Net payment systems.
- Improved transaction success rate by **15%**.
- Implemented secure authentication (JWT, OAuth).

Tier5 | Team Leader *(Dec 2015 – Oct 2018, Kolkata)*

- Led team of 13 junior engineers delivering **IoT & chatbot** solutions.
- Developed automation systems and reusable libraries.
- Developed industrial automation (conveyor systems).

KEY PROJECTS

Global Travel Booking Platform (React + AEM)

- Designed multi-tenant platform supporting global partners.
- Developed reusable component library with AEM SPA Mapping, enabling rapid onboarding of global partners (e.g., Air New Zealand, Wyndham).
- Reduced engineering dependency by 40% via AEM-driven dynamic configurations enabling non-technical teams to manage global content.

Banking Data Platform

- Senior System Engineer in **banking & finance domain**, building scalable React.js applications with custom UI libraries, **Jest-Cucumber (Enzyme) testing**, and strict Agile practices.
- Leveraged GitHub Copilot for AI-assisted development, automating test generation and accelerating component development; also contributed as UI Lead on enterprise CRM platforms.
- Employed best practices: **lazy loading**, error handling, and component reuse.

EDUCATION

B.Tech – Computer Science & Engineering (2011 – 2015)

Narula Institute of Technology
